Synthetic Organic Chemist Opportunities

High Force Research Ltd., a long established Contract Research Organisation based in Bowburn, Durham is looking for a graduate chemist to join the present team at either their Bowburn or Wilton Research Centre laboratories.

The position will offer the chance to undertake challenging organic chemical synthesis in our laboratories on scales from grams to kilograms to a high quality standard.

The successful applicant will work as part of a team and full training will be given to enable them to learn the skills and techniques necessary to full fill the role as an experienced synthetic organic chemist.

The laboratories have state of the art equipment for both synthesis and analysis and the trainee will be encouraged to learn all the techniques required to be a successful synthetic chemist.

Applicants should have a degree in chemistry, be enthusiastic, self- motivated and have the ability to organise, plan and prioritise in order to fulfil project deadlines.

If invited to attend an interview, applicants will be expected to give a short presentation on a topic of synthetic chemistry of their choosing.

To apply please email your letter of application, CV and any relevant supporting documents to info@highforceresearch.com, FAO of Dr Nicola Lembicz, (Research Manager).

The closing date for applications is 30th June 2018.
